SUMMARY

Senior Product Designer, 6+ years, Bengaluru. I design AI and B2B SaaS products people can trust, deciding what the system shows, what it asks, and when it should be handed back to a person. Founding designer at a cybersecurity company, where I built the design practice from zero and shipped the design system as a versioned npm package. Founder of CleanTab, a live AI tax product I designed, coded and shipped solo.

EXPERIENCE

CleanTab

Founder | Bengaluru, India | Jun 2026 - Present

- Designed, coded and shipped solo in TypeScript and React: onboarding, ledger, the tax engine and the filing flow. Live with 23 users and 10 paying users since July 2026.
- Validated the tax engine against a chartered accountant's own filing, matching to the rupee across 1,114 records.

Ofofo

Founding Product Designer | Bengaluru, India | Jul 2023 - Jun 2026

- First designer in the company, reporting to the CEO. Built the design practice from zero.
- Designed the compliance questionnaire flow end to end: evidence gathered automatically from company systems and subprocessors, AI drafting each answer, a human virtual Chief Information Security Officer (vCISO) approving before anything is sent.
- Cut questionnaire turnaround from 30+ days to about 30 minutes across 1,400+ controls.
- 178 questions in one run came back 97% accurate on the on-premise build before review, so the interface surfaces weak answers for the human CISO instead of presenting a finished document.
- Ran a 14-participant prototype study: 71% preferred tables plus a knowledge graph over chat alone, which set the direction for the AI surfaces.
- Redesigned onboarding navigation and decision flows, cutting bounce from 73% to 41%.
- Built the design system to 266+ components, 70+ published on npm, holding 96% integrity across visual regression, token audits and interaction tests; AI-generated UI reproduces its components faithfully about 9 times in 10.
- Owned the buyer and seller dashboards, the desktop app, the AI chat suite and the third-party risk management (TPRM) dashboard. Hired and mentored junior and contract designers.

Gupshup (Dotgo)

UI Developer and UX Designer | Bengaluru, India | May 2021 - Mar 2023

- Designed both sides of the Rich Communication Services (RCS) platform end to end: 120+ screens across two consoles.
- Shipped chatbot analytics, WhatsApp and RCS reporting, and the template preview module that became the platform's biggest selling point.
- Cut dashboard load times by 40% and support complaints by 73%.
- Mobile redesign of the bot store doubled monthly page views.

iLaczen Technologies

UI Developer | Bengaluru, India | Mar 2020 - May 2021

- Designed and built client projects end to end, wireframes and UI through to front-end implementation. Client-facing from the first week.
- Mobile and tablet redesign lifted client retention by around 40% and mobile traffic by around 30%.

INDEPENDENT WORK

Freelance design, as 11pixels Design Studio

Bengaluru, India | Mar 2024 - Present

- Branding, identity, graphics and digital design for startups and businesses across India and the Middle East.
- Bahrain Ministry of Interior comic initiative. RYNA and Chazo packaging, on shelves.

PROJECTS

Squint: Nine browser games, including a Tetris controlled through the webcam. (Ongoing Project)

Investu: Telegram bot screening 100+ Indian large-caps, the S&P 500, mutual funds and live IPOs, built on five free APIs at zero running cost.

Tovak: Site and identity for a small logistics business.

SKILLS

Design: product design, interaction design, design systems, information architecture, design strategy, user research, usability testing, prototyping, accessibility (WCAG 2.2 AA).

Build: TypeScript, JavaScript, React, HTML, CSS, Three.js, GSAP, Playwright.

Tools: Figma, Figma AI, Framer, Webflow, Miro, Maze, Balsamiq, Claude, Claude Code, ChatGPT, Notebook LM.

EDUCATION

St. Joseph's College (Autonomous)

BCA, Bachelor of Computer Applications, Computer Science | Bengaluru, India | 2016 - 2019

CERTIFICATIONS

IBM Enterprise Design Thinking Practitioner, Jan 2023.

LANGUAGES

English, Kannada and Urdu (full professional). Hindi (professional working). German (elementary).
